It is believed that the troops seen entering the Artillerie Kaserne belonged to the 58th Mecz Regt of this division. The number of tanks reportedly seen is overestimated whereas the occupation of the barracks installation seems to be underestimated by about 1,000 soldiers. The tanks observed at the Fliegerhorst Kaserne confirm a previous assumption which had been voiced in the winter of 1951/1952 that the 33d Tank Regt (TS) of the aforementioned division which was previously believed stationed in Parchin might be quartered in Perleberg. The number of 131 tanks observed probably is an error in transmission and by estimating a 50 percent deduction would result in the actual number of tanks of this regiment.

25X1 The 24 AT guns cannot be accounted for. They possibly belong to an AT unit which has been observed in Stendal-Borstel since 1951. It is also possible that [redacted] may have confused these guns with guns of the 2511th AAA Regt (US) of the aforementioned division. Observations made prior to the beginning of the summer training season and the information contained in the present report tend to indicate that units occupying the Fliegerhorst Kaserne included the Hq 18th Mecz Div, the 921st Sig Bn (US), the 33d Tank Regt (US), the 2511th AAA Regt (US) and/or an unidentified AT artillery unit.
